

# WHO NEEDS CLIMATE JUSTICE IN BRAZIL?

A LECTURE BY  
ANDRÉIA  
COUTINHO  
LOUBACK

This lecture offers a brief overview of socio-environmental injustices through marginalized and invisible voices. Beyond the Amazon region, what are the current social, political and economic challenges of climate justice in the country?

Andréia Coutinho Louback is a journalist from PUC-Rio, with a masters in Ethnic Racial Relations from CEFET/RJ and a specialist in climate justice in Brazil. She is currently a fellow of the Fulbright Humphrey Fellowship (2021-22) program at UC Davis.

She has worked as communication coordinator at the Instituto Clima e Sociedade (iCS) and at the Instituto Alana Climatic and Socio-environmental Justice project. She then coordinated a study on climate justice, gender and inequalities, which is forthcoming by the Climate Observatory, and also actively participated in the translation of the book *Climate Justice: Hope, Resilience and the Fight for a Sustainable Future*, by Mary Robinson, in Brazil. She is currently doing a professional residency as a climate justice specialist at the United Nations Population Fund (UNFPA) as part of her fellowship. Among its main themes of action and passion are: climate and socio-environmental justice, inclusive urbanization and racial inequalities.
